ABOUT **CILT**

(THE CHARTERED INSTITUTE
OF LOGISTICS & TRANSPORT)

The Chartered Institute of Logistics and Transport

The Chartered Institute of logistics & Transport is the leading professional body associated with logistics and transport with over 33,000 members in over 100 countries worldwide, CILT holds unparalleled professional international recognition.

Established in 1919 and receiving its Royal Charter in 1926, the institute has an exciting history behind it, but is always adapting to stay consistent with current logistics and transport issues.

The principal objective of the Institute is “To promote and encourage the art and science of logistics and transport”. The Institute achieves this objective through both its membership and its educational qualifications.

Membership provides a professional identity to those in the logistics and transport sector, as well as international recognition. The Institute’s professional qualifications educate not only those already in the sector, but also those wishing to enter into it.

The Institute is represented worldwide with National Councils, National Independent Sections and Institute Branches. Each territorial organization is, in its own right, a separate organization representing the Chartered Institute of Logistics & Transport in their territory. They all share the common cause of achieving the institute’s primary objective.

KNOW THE INDUSTRY

Logistics is the art and science of managing and controlling the flow of goods, energy, information and other resources from the source of production to the marketplace.

Logistics is concerned with strategically managing the supply chain so that the right goods get to the right place, in the right quantity, at the right time, in the best condition & at an acceptable cost, It is a practical discipline, concerned with planning and management, and is very much focused on getting things done.

A centre focus of all business organizations today is the management of their supply chains. A typical supply chain for a product involves input from the supplier, producer distribution centre, retailer & consumer, whilst transport is the link between all stages - Transportation firms, Third party logistics firms, Manufacturing firms, Merchandizing firms, Consulting firms, Service institutions and other organizations.

MARKET SCENARIO FOR LOGISTICS IN INDIA

Rising investment, rapidly evolving regulatory policies, mega infrastructure projects and several other developments in recent times have driven the Indian logistics market, simultaneously, also overcoming infrastructure-related constraints and logistics-centric inefficiency. While traversing this road to development, multiple projects and services have been either at the planning or implementation stage. Such developments have spanned across all modes of transportation and logistics services and have involved active participation from all stakeholders.

MARKET OPPORTUNITIES *According to KPMG Report

Workforce is expected to reach 28.40 million by 2022

	Employment (in Million)			Employment growth 2013-17	Employment growth 2017-22
